MOORESTOWN

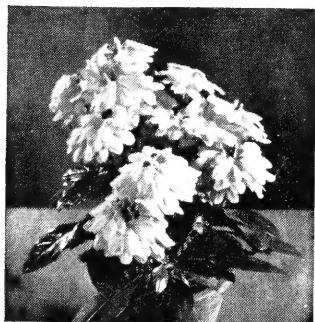

NEW JERSEY

### AUTUMN SEED-SOWING

Seeds of many hardy perennials, bulbs, shrubs and trees need exposure to low soil temperatures in order to germinate. They are best handled by sowing in open ground seed beds or frames, from late October, on through early winter, germination expected in spring. This includes seeds of Lilies, Primulas, Gentians, Irises, Aconitum and the some hundreds of others marked in our General Catalog #59 with the cultural key letters KT, YT, or Y. We suggest that you order seeds of these groups now. House plant seeds, key letter W, may be sown under glass year around. If you do not have General Catalog #59 already, please write us for a copy now. It will come quickly.

### FANCY-LEAF GERANIUMS

## THE LOVELY LILY OF PERU

It's an old name for **ALSTROEMERIA**, really not too accurate a name either, since so many of them come from other parts of South America. And they are closer to Amaryllis than to Lily, though they rival the Lilies in beauty. All cut well. Rising from tangles of slender, brittle root-tubers, they give great sheafs of blossom splendor, blooming long and freely. Winter-hardy at Philadelphia if mulched. In much colder climates, better dig as one would Dahlia, giving cool winter storage in sand. *Illustrated opposite*.

## DAINTY SMALLER HYACINTHS

The first three are true Hyacinths in graceful, alpine species. Then come their cousins, the Grape Hyacinths or Muscari. **HYACINTHUS AMETHYSTINUS**—Delight from Spanish mountains; sprays of crispy, waxy bells in amethystine blue. 5 for 40¢; 10 for 70¢; 25 for \$1.45. **HYACINTHUS AMETHYSTINUS ALBUS**—The last in snowy white. 5 for 45¢; 10 for 80¢; 25 for \$1.85. **HYACINTHUS AZUREUS**—Smallest true Hyacinths. **IXIA MIXED**—Of all South African bulbs, none yields greater variety, nor brighter, colorings than does *Ixia*. **AQUILEGIA JONESI**—A treasure from high mountains. It is a gem for the rock garden with ground-hugging, silvery, lace-like foliage, the comparatively large, upfacing flower of clear blue-lavender just above. Height of the whole is seldom over 2 or 3 inches, and even under the fattest of growing conditions, 5 inches seems about its upper limit. Give perfect drainage. It has a resting period, and we supply semi-dormant roots. Each 65¢; 3 for \$1.75; 10 for \$6.00.

Sometimes the flowers are yellow, but more often a white or lilac ground is banded, splashed or stained with crimson, mahogany, chocolate or mulberry. Hardy at our nursery. Worthy of wide planting. *Illustrated opposite*. 3 for 40¢; 10 for \$1.10; 25 for \$2.00; 50 for \$3.75; 100 for \$7.00.
